FUND MANAGER'S REVIEW

The Fund's performance for the month was 0.15% as compared to its benchmark's return of 0.21%, translating to an underperformance of 0.06%.

The Federal Reserve delivered a jumbo 50 basis points (bps) cut on the Federal Fund Rate (FFR) to 4.75% - 5.5%, as priced in by some market participants. This came on the back of favorable inflation outlook and early signs of weaknesses in the labour market. The dot plots indicate another 50bps cut before the year end, a further 100bps reduction in 2025 and an additional 50bps cut in 2026. The US economy added 142K jobs in August, below forecasts of 160K. On inflation, the Personal Consumption Expenditures (PCE) price index rose 2.2% year-over-year (y/y) in August and the core PCE edged higher to 2.7% y/y from 2.6% in July, within expectations. Despite the jumbo rate cut rates consolidated slightly higher post the decision. The 10-year US Treasury (UST) yields closed the month only firmer by 12bps at 3.78%.

Local government bond yields also closed relatively flat. The 3-year, 5-year and 10-year Malaysian Government Securities (MGS) yields ended September at 3.33%, 3.50% and 3.71% respectively. Bank Negara Malaysia left the Overnight Policy Rate (OPR) unchanged at 3.0% amidst a favorable economic and inflation outlook.

Amidst expectation of lower global interest rates, we remain positive on local sukuk. Fund Manager intends to remain highly invested and will look to increase the Fund's duration if opportunities arise.

Note:

Based on the Fund's portfolio returns as at 10 October 2024, the Volatility Factor (VF) for this Fund is 1.6 and is classified as "Very Low". The VF means there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified Funds. VF is subject to monthly revision and VC will be revised every six months. The Fund's portfolio may changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only Funds launched in the market for at least 36 months will display the VF and its VC.

FUND MANAGER'S REVIEW

The Fund's performance for the month was 4.97% as compared to its benchmark's return of 0.21%, translating to an outperformance of 4.76%.

The Federal Reserve delivered a jumbo 50 basis points (bps) cut on the Federal Fund Rate (FFR) to 4.75% - 5.5%, as priced in by some market participants. This came on the back of favorable inflation outlook and early signs of weaknesses in the labour market. The dot plots indicate another 50bps cut before the year end, a further 100bps reduction in 2025 and an additional 50bps cut in 2026. On inflation, the Personal Consumption Expenditures (PCE) price index rose 2.2% year-over-year (y/y) in August and the core PCE edged higher to 2.7% y/y from 2.6% in July, within expectations. Despite the jumbo rate cut rates consolidated slightly higher post the decision. The 10-year US Treasury (UST) yields closed the month only firmer by 12bps at 3.78%.

Local government bond yields also closed relatively flat. The 3-year, 5-year and 10-year Malaysian Government Securities (MGS) yields ended September at 3.33%, 3.50% and 3.71% respectively. Bank Negara Malaysia left the Overnight Policy Rate (OPR) unchanged at 3.0% amidst a favorable economic and inflation outlook.

Amidst expectation of lower global interest rates, we remain positive on local sukuk. Fund Manager intends to remain highly invested and will look to increase the Fund's duration if opportunities arise.

FUND MANAGER'S REVIEW

The Fund's performance for the month was 3.17% as compared to its benchmark's return of 0.21%, translating to an outperformance of 2.96%.

The Federal Reserve delivered a jumbo 50 basis points (bps) cut on the Federal Fund Rate (FFR) to 4.75% - 5.5%, as priced in by some market participants. This came on the back of favorable inflation outlook and early signs of weaknesses in the labour market. The dot plots indicate another 50bps cut before the year end, a further 100bps reduction in 2025 and an additional 50bps cut in 2026. The US economy added 142K jobs in August, below forecasts of 160K. On inflation, the Personal Consumption Expenditures (PCE) price index rose 2.2% year-over-year (y/y) in August and the core PCE edged higher to 2.7% y/y from 2.6% in July, within expectations. Despite the jumbo rate cut rates consolidated slightly higher post the decision. The 10-year US Treasury (UST) yields closed the month only firmer by 12bps at 3.78%.

Local government bond yields also closed relatively flat. The 3-year, 5-year and 10-year Malaysian Government Securities (MGS) yields ended September at 3.33%, 3.50% and 3.71% respectively. Bank Negara Malaysia left the Overnight Policy Rate (OPR) unchanged at 3.0% amidst a favorable economic and inflation outlook.

Amidst expectation of lower global interest rates, we remain positive on local sukuk. Fund Manager intends to remain highly invested and will look to increase the Fund's duration if opportunities arise.
