FUND MANAGER'S REVIEW

In September, the RM class of the Fund reported a gain of 0.16%, outperforming its benchmark, which decreased by -0.06%, resulting in an outperformance of 0.22%. The outperformance was largely fueled by strong performance in the Healthcare, Construction, Property, and REIT sectors.

Malaysia's economy is showing robust growth, with a 4.2% increase in Q1 and a significant 5.9% in Q2 of 2024. This aligns with expectations for the second half of the year, bolstered by stabilizing global electronics markets, substantial governmental investments, and resilient consumer spending. Consequently, the economy is likely to achieve the upper end of the 2024 Gross Domestic Product (GDP) growth target range of 4-5%. The Bank Negara Malaysia has maintained the Overnight Policy Rate at 3.0%, signaling optimism for sustained growth.

The Malaysian Ringgit is gaining strength, supported by favorable policies attracting foreign direct investment and the "China Plus One" strategy. The FBMKLCI index remains undervalued at 15x compared to its historical range of 16x to 17x, indicating potential for appreciation. Political stability and domestic investments from Government Linked Companies contribute to this positive outlook.

Amid heightened volatility, our strategy focuses on high-quality stocks, leveraging market consolidation to increase positions. We recognize that downturns often present valuable opportunities to acquire undervalued stocks at attractive prices.

Note:
