FUND MANAGER'S REVIEW

In September, the Fund's Net Asset Value (NAV) decreased by -0.74% against its benchmark of -0.34%. This translated to an underperformance of 0.41%, largely driven by weak performances in key sectors during the month.

Malaysia's economy is showing robust growth, with a 4.2% increase in Q1 and a significant 5.9% in Q2 of 2024. This aligns with expectations for the second half of the year, bolstered by stabilizing global electronics markets, substantial governmental investments, and resilient consumer spending. Consequently, the economy is likely to achieve the upper end of the 2024 Gross Domestic Product (GDP) growth target range of 4-5%. The Bank Negara Malaysia has maintained the Overnight Policy Rate at 3.0%, signaling optimism for sustained growth.

The Malaysian Ringgit is gaining strength, supported by favorable policies attracting foreign direct investment and the "China Plus One" strategy. The FBMKLCI index remains undervalued at 15x compared to its historical range of 16x to 17x, indicating potential for appreciation. Political stability and domestic investments from Government Linked Companies contribute to this positive outlook.

Amid heightened volatility, our strategy focuses on high-quality stocks, leveraging market consolidation to increase positions. We recognize that downturns often present valuable opportunities to acquire undervalued stocks at attractive prices.

Note:

Based on the Fund's portfolio returns as at **10 October 2024**, the Volatility Factor (VF) for this Fund is **14.7** and is classified as "**High**". The VF means there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified Funds. VF is subject to monthly revision and VC will be revised every six months. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only Funds launched in the market for at least 36 months will display the VF and its VC.

Lipper Ratings for Total Return reflect fund historic total return performance relative to peers. Lipper Ratings for Consistent Return reflect fund historical risk-adjusted returns relative to peers. Lipper Ratings for Preservation are relative, rather than absolute.
