FUND MANAGER'S REVIEW, OUTLOOK AND STRATEGY

In 2024, global equity markets showcased varied performance. The S&P 500 and Nasdaq Index delivered impressive annual returns of 23.31% and 28.64%, respectively. However, the S&P 500 slipped 2.50% in December, while the Nasdaq posted a modest 0.48% gain for the month, driven by optimism surrounding rate cuts, economic resilience, and artificial intelligence advancements. In contrast, the MSCI Europe Index dipped 0.53% month-on-month (MoM) in December, pressured by monetary policy uncertainties and high valuations. Meanwhile, the DJIA fell 5.27% in December, ending the year with a respectable 12.88% annual gain.

The Asia-Pacific region delivered mixed results. Japan's Nikkei 225 and Taiwan's TAIEX led December performance with gains of 4.41% and 3.47%, respectively. Conversely, South Korea's KOSPI and India's Nifty 50 were the month's worst performers, declining 2.30% and 2.02%, respectively. Taiwan's TAIEX surged 28.47% year-to-date (YTD) in 2024, supported by robust industrial production and growing technology demand. In contrast, South Korea's KOSPI dropped 9.63% YTD, hampered by political turmoil following President Yoon Suk Yeol's failed attempt at martial law and subsequent suspension.

The Malaysian equity market experienced a robust 2024, especially during the first half of the year. The FTSE Bursa Malaysia Index Series recorded broad-based growth, with several indices surpassing 15%. While foreign investors were significant contributors to the market in the first three quarters, net selling emerged in the last quarter. December marked a strong close for Malaysian equities, with the FBMKLCI rising 3.01% and the FBM EMAS Shariah gaining 4.62%.

Malaysia's equity market outlook remains optimistic, underpinned by Gross Domestic Product (GDP) growth, abundant local liquidity, and sector-specific drivers such as data center expansion and public infrastructure projects. Tourism-related industries are well-positioned for growth, bolstered by a weaker ringgit and supportive policies. Additionally, state-driven initiatives and strategic investments in Johor, Sarawak, and Penang are expected to sustain momentum, enhancing Malaysia's competitiveness and investment appeal in 2025.

Note:

Based on the Fund's portfolio returns as at **10 January 2025**, the Volatility Factor (VF) for this Fund is **11.8** and is classified as "**Moderate**". FUND MANAGER'S REVIEW, OUTLOOK AND STRATEGY

In 2024, global equity markets showcased varied performance. The S&P 500 and Nasdaq Index delivered impressive annual returns of 23.31% and 28.64%, respectively. However, the S&P 500 slipped 2.50% in December, while the Nasdaq posted a modest 0.48% gain for the month, driven by optimism surrounding rate cuts, economic resilience, and artificial intelligence advancements. In contrast, the MSCI Europe Index dipped 0.53% month-on-month (MoM) in December, pressured by monetary policy uncertainties and high valuations. Meanwhile, the DJIA fell 5.27% in December, ending the year with a respectable 12.88% annual gain.

The Asia-Pacific region delivered mixed results. Japan's Nikkei 225 and Taiwan's TAIEX led December performance with gains of 4.41% and 3.47%, respectively. Conversely, South Korea's KOSPI and India's Nifty 50 were the month's worst performers, declining 2.30% and 2.02%, respectively. Taiwan's TAIEX surged 28.47% year-to-date (YTD) in 2024, supported by robust industrial production and growing technology demand. In contrast, South Korea's KOSPI dropped 9.63% YTD, hampered by political turmoil following President Yoon Suk Yeol's failed attempt at martial law and subsequent suspension.

The Malaysian equity market experienced a robust 2024, especially during the first half of the year. The FTSE Bursa Malaysia Index Series recorded broad-based growth, with several indices surpassing 15%. While foreign investors were significant contributors to the market in the first three quarters, net selling emerged in the last quarter. December marked a strong close for Malaysian equities, with the FBMKLCI rising 3.01% and the FBM EMAS Shariah gaining 4.62%.

Malaysia's equity market outlook remains optimistic, underpinned by Gross Domestic Product (GDP) growth, abundant local liquidity, and sector-specific drivers such as data center expansion and public infrastructure projects. Tourism-related industries are well-positioned for growth, bolstered by a weaker ringgit and supportive policies. Additionally, state-driven initiatives and strategic investments in Johor, Sarawak, and Penang are expected to sustain momentum, enhancing Malaysia's competitiveness and investment appeal in 2025.
