

BIMB *i* FLEXI FUND

FUND MANAGER'S REVIEW

The FBMS Index was down by 2.02% in September as the local stock market declined due to further profit taking activities on Bursa Malaysia by retail investors ahead of the expiry of loan moratorium as well as decline on US market. As a result, the Fund's performance had decreased by 7.42% on a 1 month basis and underperformed the benchmark by 6.49% during the same period under review due to weaker performance of its investments in the Technology and Healthcare sector stocks.

In view of the current stock market sentiment which appears to be slightly more on the negative note due to various uncertainties such as local Covid-19 case resurgence as well as US presidential election, the Fund will adopt a more active approach to adjust its stock mix and cash allocation to reduce downside risk for the fund while positioning for NAV rebound potential in the medium term horizon.
