

BIMB / FLEXI FUND

FUND MANAGER'S REVIEW

The FBMS Index was down by 2.03% in August as the local stock market declined due to profit taking activities on Bursa Malaysia. Nonetheless, the Fund's return had increased by 4.07% on a 1 month basis as compared to its benchmark (50% of FBM Emas Shariah + 50% of 12 month Bank Islam TDT-i) return of -0.93%, thereby outperforming the benchmark by 5.00% during the period under review due to better performance of its stock mix and holding in the Consumer and Technology sector.

In view of the current stock market sentiment which appears to be slightly more on the negative note, the Fund will adopt a more active approach to adjust its stock mix and cash allocation to reduce downside risk for the fund if market sentiment continues to weaken further.
