5. What are the possible outcomes of my investment?

The investor may gain from the appreciation of unit price as a result of the increase in value of the underlying and/or accrual of profit earned.

However, investment involves risk. The value of the Fund and its distribution (if any) may rise or fall. These risk factors, among others, may cause you to lose part or all of your investment.

6. What are the key risks associated with this product?

General risks of investing in the fund

- a. **Market Risk** – This risk arises due to fluctuations in market value of investments. Such fluctuations occur because of factors that affect the entire market. Market risk cannot be eliminated by diversification. It stems from the fact that there are economy-wide perils which threaten all businesses. Hence investors will be exposed to market uncertainties, and no matter how many equities are held, fluctuations in the economy, political and social environment will affect the market price of the investments.
- b. **Shariah Non-Compliance Risk** – This is a risk that the Fund may hold investments which are not Shariah-compliant by error or the administration and operation of the Fund are not in line with Shariah rules and principles. If this occurs, there is a possibility that the Unit price of the Fund may be adversely affected due to rectification required.
- c. **Management Risk** – Poor management of the Fund may cause losses to the Fund which in turn may affect the capital invested by Unit Holders. The Manager is able to manage such risk with close monitoring by the Investment Committee members which will oversee the activities and performance of the Fund.
- d. **Financing Risk** – This risk occurs when the investors take financing to finance their investment. The inherent risk of investing with financed money includes investors being unable to service the financing payment. In the event Units are used as collateral, an investor may be required to top-up the investor's existing installment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per unit as compared to the NAV per unit at the point of purchase towards settling the financing.

Other financing risk factors to consider include:

- i. the higher the margin of financing, the greater the potential for losses as well as gains; and
 - ii. if the financing taken is a variable profit rate financing and profit rates rise, the total payment amount will increase.
- e. **Risk of Non-Compliance** – This is a risk where the Fund may be mismanaged due to the Manager's non-compliance with the provisions set out in the Deed or the Master Prospectus or the laws/guidelines governing the Fund or the Manager's own internal procedures or where the employee of the Manager acts fraudulently or dishonestly in managing the Fund. This may also occur when the Manager does not adhere to the investment mandate of the Fund.

Specific risks associated with investing in the fund

- a. **Specific Security Risk** – Specific security risk refers to the risk of investing in any particular security. Specific security risk includes but is not limited to legal suits, competitive operating environment, decline in profitability and mismanagement of a specific company issuing a security. Specific security risk could result in a decline in the price of the security and in turn cause a decline in the NAV of the Fund. This risk can be mitigated by security analysis conducted by the Manager.
- b. **Credit/Default Risk** – Credit risk relates to the creditworthiness of the issuers of the Sukuk and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the Sukuk. In the case of rated Sukuk, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a Sukuk either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the Sukuk. This could adversely affect the value of the Fund.
- c. **Profit/Interest Rate Risk** – Generally, changes in the level of general interest rates* may cause prices of Sukuk to change inversely. This risk can be mitigated by holding Sukuk investment until maturity, thereby locking in its yield. The Manager also manage profit/interest rate risk by considering each Sukuk's sensitivity to profit/interest rate changes as measured by its duration.

**Note: The term interest rate does not in any way suggest that this Fund will invest in securities or instruments which are Shariah non-compliant. All investments carried out for the Fund is in accordance with principles of the Shariah.*

- d. **Shariah Non-Compliance Risk** – This risk refers to the risk that the currently held Shariah-compliant equities in the Fund may be reclassified as Shariah non-compliant in the periodic review of the equities by the SAC SC, the Shariah adviser or the Shariah boards of the relevant Islamic indices. If this occurs, the Manager will take the necessary steps to dispose such equities. There may be opportunity loss to the Fund due to the Fund not being allowed to retain the excess capital gains derived from the disposal of the Shariah non-compliant equities.
- e. **Counterparty Risk** – Counterparty risk refers to the risks that any licensed financial institution that the Fund may deal with, under certain circumstances, fail to perform their obligations when due. This will result in the Funds to experience significant losses.
- f. **Structured Product Risk** – Structured products are subject to the risks associated with the underlying market or security and may be subject to greater volatility than direct investments in the underlying market or security. Structured products may entail the risk of loss of principal and/or profit payments as a result of movements in the underlying market or security. This will result in the Fund to experience significant losses.
- g. **Collective Investment Scheme Risk** – Poor management of the collective investment scheme (CIS) due to the lack of experience, knowledge, expertise and poor management techniques of the investment manager would have an adverse impact on the performance of the CIS. This may result in the Fund suffering loss in its investments in the CIS.
- h. **Dividend Risk** – There may be times when companies are unable to declare any dividends. Therefore, the Fund may have less income for that period.
- i. **Equity-related Securities Risk** – The Fund may invest in warrants and the value of warrants is influenced by the current market price of the underlying security, the exercise price of the warrant, the time to expiration of the warrant and the estimate of the future volatility of the underlying securities price over the life of the warrant. Particularly, risk factor related to warrants encompasses value decay over time as the warrant approaches its due date especially in the event that the warrants are held and not exercised.
- j. **Country Risk** – Investments of the Fund in any countries may be affected by changes in the country's economic, social and political stability, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of Units to fall.
- k. **Currency Risk** – As the investments of the Fund may be denominated in currencies other than the base currency of the Fund, any fluctuation in the exchange rate between the base currency of the Fund and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency of the Fund, this will have an adverse effect on the NAV of the Fund in the base currency of the Fund and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
- l. **Political Risk** – Political instability that arises from disruption of economic activity and social unrest may directly or indirectly impact the Fund's investment in a particular country. A change in government or government policies with regards to its capital market regulations may effect a Fund's financial position, possibly causing a Fund to liquidate its position at a less ideal price or below investment cost. Government policies may not have the same approach in perpetuity.
- m. **Regulatory Risk** – The Fund's investments are exposed to laws and regulations in the respective countries they invested in. Regulatory changes in these countries may pose a risk to the Fund as it may materially impact the Fund's investments. The Manager will continuously keep abreast with the regulatory developments in each respective country in mitigating such risk.

IT IS IMPORTANT TO NOTE THAT EVENTS AFFECTING THE INVESTMENTS CANNOT ALWAYS BE FORESEEN. THEREFORE, IT IS NOT ALWAYS POSSIBLE TO PROTECT INVESTMENTS AGAINST ALL RISKS. THE VARIOUS ASSET CLASSES GENERALLY EXHIBIT DIFFERENT LEVELS OF RISK. THE INVESTMENT OF THE FUND CARRIES RISKS AND INVESTORS ARE RECOMMENDED TO READ THE WHOLE PROSPECTUS TO ASSESS THE RISKS OF THE FUND.

INVESTORS ARE REMINDED THAT THE ABOVE LIST OF RISKS MAY NOT BE EXHAUSTIVE AND IF NECESSARY, THEY SHOULD CONSULT THEIR ADVISER(S).

Notes:

- Total Return** of the Fund has been verified by Novagni Analytics & Advisor Sdn. Bhd. (363145-W)
- Average Total Return** is derived by this formula:

$$\frac{\text{Total Return}}{\text{Number of Years under Review}}$$

Past performance is not necessarily indicative of future performance and unit prices and investment returns may go down, as well as up.

Portfolio Turnover Ratio (“PTR”)

For the Year Ended 30 June	2022	2021	2020
BIMB i Growth (times)	1.03	2.76	3.92

The Fund’s PTR decreased from 2.76 times in the financial year ended 2021 to 1.03 times in financial year ended 2022 mainly due to lower trading activities of the fund during the period under review.

The PTR is calculated as follows: -

$$\text{PTR} = \frac{[\text{Total acquisition of the Fund for the year} + \text{Total disposal of the Fund for the year}] / 2}{\text{Average net asset value of the Fund for the year calculated on a daily basis}}$$

PAST PERFORMANCE OF THE FUND IS NOT AN INDICATION OF ITS FUTURE PERFORMANCE.
