5. What are the possible outcomes of my investment?

The investor may gain from the appreciation of unit price as a result of the increase in value of the underlying and/or accrual of profit earned.

However, investment involves risk. The value of the Fund and its distribution (if any) may rise or fall. These risk factors, among others, may cause you to lose part or all of your investment.

KEY RISKS

6. What are the key risks associated with this product?

GENERAL RISKS:

- **Market Risk**

Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.

- **Loan/Financing Risk**

This risk occurs when investors take a loan/financing to finance their investment. The inherent risk of investing with borrowed/financed money includes the inability for investors to service the loan repayments/financing payments. In the event Units are used as collateral, an investor may be required to top-up the collateral if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower value towards settling the loan.

Other financing risk factors to consider include:

- the higher the margin of financing, the greater the potential for losses as well as gains; and
- if the financing taken is a variable profit rate financing and profit rates rise, the total repayment amount will increase.

- **Manager's Risk**

This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the Fund.

- **Shariah Non-Compliance Risk**

This risk refers to the risk that the currently held Shariah-compliant instruments in the Fund may be reclassified as Shariah non-compliant in the periodic review by the SAC Shariah screening methodology adopted by the Shariah Adviser.

If this occurs, the Manager will take the necessary steps to dispose such instruments. There may be opportunity loss to the Fund due to the Fund not being allowed to retain the excess capital gains derived from the disposal of the Shariah non-compliant instruments.

- **Operational risk**

This risk refers to the possibility of monetary loss or inconvenience due to the breakdown of the Manager's internal control and policies due to human error, system failure or fraud among Manager's employees. The Manager will regularly review its internal policies, systems capabilities and maintain strict segregation of duties in mitigating these risks.

SPECIFIC RISKS:

- **Liquidity Risk**

Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavorable prices.

- **Country Risk**

Investments of the Fund in any countries may be affected by changes in the country's economic, social and political stability, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of Units to fall.

- **Currency Risk**

As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa.

Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

- **Political Risk**

Political instability that arises from disruption of economic activity and social unrest may directly or indirectly impact the Fund's investment in a particular country. A change in government or government policies with regards to its capital market regulations may affect the Fund's financial position, possibly causing the Fund to liquidate its position at a less ideal price or below investment cost. Government policies may not have the same approach in perpetuity.

- **Regulatory Risk**

The Fund's investments are exposed to laws and regulations in the respective countries they invested in. Regulatory changes in these countries may pose a risk to the Fund as it may materially impact the Fund's investments. The Manager will continuously keep abreast with the regulatory developments in each respective country in mitigating such risk.

- **Credit/Default Risk**

The risk arises when the issuer of a Sukuk or Islamic money market instrument is unable to service any periodic obligations, e.g. profit payments and/or pay the principal amount when due. In such cases, investors will suffer significant losses. This risk can be mitigated by credit analysis conducted by the Manager to determine the issuer's ability to service promised payments.

- **Profit Rate Risk**

Changes in the level of general profit rates may cause prices of Sukuk or Islamic money market instrument to change inversely. When profit rates rise, Sukuk prices generally decline and this will lower the market value of the Fund's investment in Sukuk. The Manager manages profit rate risk of Sukuk or Islamic money market instruments by considering their sensitivity to profit rate changes as measured by its duration.

Investors are reminded that the above list of risks may not be exhaustive and if necessary, investors should consult their adviser(s), e.g. bankers, lawyers, stockbrokers for a better understanding of the risks.

Note: Please refer to the Fund's Information Memorandum for further details of each risk.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are advised to read the Fund's Information Memorandum to assess the risks associated with the Fund. Please consult your professional advisers(s) for a better understanding of the risks, if necessary.

If your investments are made through the distributor (i.e. the institutional unit trust adviser ("IUTA") via a nominee system of ownership), you would not be deemed to be a unit holder under the Deed and as a result, you may not exercise all the rights ordinarily conferred to a unit holder (e.g. the right to call for unit holders' meetings and the right to vote at a unit holders' meeting).
